

ZEObeads

Amorphous porous Silica Gel as micro beads

ZEObeads Silica is produced at Zeochem's ISO-9001 certified facility in Switzerland. Strict QC controls from raw material to finished product ensure high lot-to-lot reproducibility and tightly controlled specifications.

Used as industrial column packing material for general purification of natural products, food, cosmetics as well as in pre-purification of pharmaceutical and nutraceutical ingredients. ZEObeads are preferably used in liquid chromatography, flash chromatography and solid phase extraction.

Zeochem extended its product range of bonded silica gels by new ZEObeads – amorphous porous silica gel as micro beads.

	Pore Size	Particle Size	Product	Art. No.
ZEObeads	50 Å	20 – 30 µm	ZEObeads 50 C18	3202688.617.810
		20 – 30 µm	ZEObeads 50 C8	3202687.617.810
		20 – 30 µm	ZEObeads 50 NH2	3202690.617.810
